

IT'S A TIME TO

The Sustainable Power for the World's Future

EIC Profile Company

INDEX

- About EIC
- EIC Partners
- EIC Products
- EIC Services
- EIC Clients

E.I.C was established in the sixties of last century in the automotive batteries market that it was a start, Then the successes generated expansions so that E.I.C became a major supplier in the MEA market for all types of green energy savers solutions and utility, as well as UPS batteries and Electric cars of all types, in addition to all types of batteries of solar energy and renewable energy.

EIC is one of the largest companies in the green energy solutions market in MEA, as it is the sole representative of a group of the largest European, American and British manufacturers of energy solutions in the world because of its great history and distinctive capabilities in this area.

When Energy Can Do Further

Vision

To be a one of the greatest green energy developers in the World by the year 2030

Mission

Working to provide clean and renewable energy solutions within different markets and to serve all productive and service sectors through providing all sizes and models of batteries as well as its applications, in addition to providing after-sales services to maximize the value of our solutions with effective cost.

Objectives,

Sustain and increase our market share by providing the right solution to the customers and ensure that it meets with the customers' budget and satisfaction expectations.

Filling the gap of knowledge & experience in the power and batteries Business Community with practical visits and seminars by our technical team.

Connecting the business community members with new horizons of healthy growth by ensuring a sustainable and constant green power and batteries source.

Developing the public usage culture of the energy to depend totally on the green and clear power sources.

Strive for increasing our customer loyalty so we consider every contact is the beginning of the long-term relationship.

Motive Power Batteries

Automotive Power Batteries

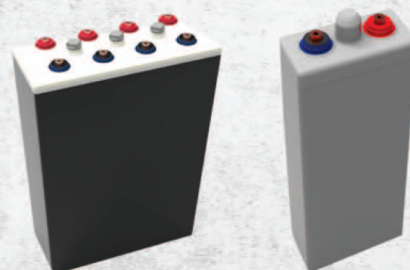

SORIN

Standby Power Batteries

Ultracell®

Lithium Power technology.

LIMPOWER range of lithium products represents the most innovative solution in energy storage for use on industrial electrical forklifts. The long life, fast charging speed and lack of maintenance make LIMPOWER the perfect solution where performance, shift length, safety and energy efficiency must not be compromised.

Advantages :-

- Fast charging (80% in 30 minutes)
- Opportunity charging
- High number of cycles (> 3000 cycles)
- Energy saving (efficiency > 97%)
- High energy density and power
- Zero emissions
- Interfacing with other electronical/electrical devices of the forklift
- Maintenance free
- Easy to install
- It can replace previous accumulators (plug and play)

+ Electric Cars

ECOMOTIVE electric cars is one of the most reliable golf carts and battery related automotive electronic components in China by USA quality & Standards. From 2018, Ecomotive based experiences in this area. can deliver all your required electric vehicles, such as golf carts with wide range for passengers, also the sightseeing bus / low speed vehicle&Lifted carts, with utility vehicles, & forklift, stacker etc....

Ecomotive produce high quality with high standards.
